Reasons for Allowance

1. Claims 1-12 are allowed.

The prior art of record, including Clark et al. (US Patent No.: 4,651,012) and Hoover et al. (US Patent No.: 3,869,615), does not show or suggest the applicant's invention as claimed. Specifically, the prior art of record does not disclose a light diffuser combining:

- uniformly distributed openings over entire surface of a first plate; and a plurality of openings, of different diameter and coaxial with the openings of the front plate, distributed on different parts of an internal plate, which is positioned parallel to the first plate as recited in each of independent claims 1 and 5.

The above-indicated combination, including a diffuser with front and internal perforated parallel plates each with openings and their distribution as detailed above, makes this invention unique. Characteristic of light emerging out of the above detailed diffuser is typical, which would result from the above-indicated arrangement of the perforated parallel plates.

Clark et al. ('012) discloses a projection system including front and rear perforated parallel plates; each of the front and rear size plates including a plurality of equal sized openings spread over the entire surface; Further, sizes and densities of the openings in the front plate are different than those of the openings of the rear plate. Therefore, Clark et al. ('012) does not meet the limitations of each of independent claims 1 and 5.

Art Unit: 2875

Hoover et al ('615) discloses a collimator comprising a light source facing a plurality of perforated parallel plates each including randomly distributed openings; the openings in one plate having size different than that in another parallel plate. On the other hand, the claimed diffuser includes: uniformly distributed openings over entire surface of a first plate; and a plurality of openings, of different diameter and coaxial with the openings of the front plate, distributed on different parts of an internal plate. Therefore, Hoover et al. ('615) does not meet the limitations of each of independent claims 1 and 5.

Therefore, each of the independent claims 1 and 5 are allowed over prior art.

Claims 2-4, 9 and 10 are allowed because of their dependency on the allowed base Claim 1.

Claims 6-8, 11 and 12 are allowed because of their dependency on the allowed base Claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bigham (U.S. Patent No. 4,460,832), Dedden et al. (US Patent No.: 4,665,036),
Albert (U.S. Patent No. 4,465,540)
